Public Hearing Notice for newspaper
(For Ordinance and Supporting Info see “Discussion and Possible Action” Agenda Item)

Executive Summary:

The attached Ordinance addresses two issues that have recently surfaced. The first concerns a “Micro Winery”. The City has recently been approached by a local individual that would like to open a Micro Winery inside the City. Unfortunately our Zoning Ordinance does not list a “Micro Winery” as an acceptable land use. This amendment will add the Micro Winery as an acceptable use through a special use permit in areas zoned Commercial General, Commercial Office/Retail and Light Industrial. It also defines a Micro Winery as a facility producing up to 5,000 gallons of wine annually.

The Ordinance also addresses conflicting regulations for visibility obstructions along streets and intersections. The Code of Ordinances includes regulations for visibility obstructions in Chapter 22 (Streets, Sidewalks, and Public Places) and Chapter 28 (Zoning). The Ordinance will remove the conflicting regulations by referring to Chapter 22 in the Zoning Ordinance for visibility regulations. The most significant difference between the two regulations involves how the visibility triangle is measured. Under Chapter 22 the visibility triangle is measured along the curb line. Under Chapter 28 the visibility triangle is measured along the property line. Historically the City has measured the visibility triangle along the curb line, in accordance with Chapter 22.

ARTICLE II. STREETS*

DIVISION 1. GENERALLY

Sec. 22-16. Signs prohibited on street right-of-way; exceptions.

It shall be unlawful for any person to place a sign on any public street right-of-way or parkway in the city except street signs and traffic-control signs and other signs specifically authorized by the city council.

Visibility triangle shall mean a triangle sign area at all intersections, which shall include that portion of the public right-of-way and any corner lot within the adjacent curblines and a diagonal line intersecting such curblines at points 35 feet back from their intersection, such curblines being extended if necessary to determine the intersection point as shown in Exhibit A which is available for inspection in the office of the city secretary.

Parkway area shall mean that area between the curbline or grade line of any public street and the abutting private property line.

(Code 1965, § 18A-2(a))

Cross reference—Definitions and rules of construction generally, § 1-2.

***Cross references**—Handbills and posters prohibited on street right-of-way, § 13-5; obstruction of streets by trains for longer than five minutes prohibited, § 25-7; speed regulations on certain streets, § 25-106 et seq.; regulations for turning in certain streets, § 25-121; one-way streets designated, § 25-136; authority of police chief to regulate parking on certain streets, § 25-166 et seq.

Sec. 22-32. Obstructions prohibited within visibility triangle.

Such trees shall not interfere with the free passage of vehicles on the street or pedestrians on the public right-of-way or obscure the view of motor vehicle operators of any traffic-control device or street sign or otherwise create a traffic hazard.

(Code 1965, § 18A-2(c))

Sec. 22-34. Enforcement.

(a) It shall be the duty of the code enforcement officer to cause a written notice to be served upon the owner of any property upon which any of the above violations exist, or upon any owner or occupant of any property which abuts any parkway area upon which any of the above violations exist to correct such violations within ten days after service of such notice.

(b) Such notice shall be given personally or by letter addressed to such owner at his post office address, or, if the owner's address be not known and personal service not possible, by publication at least twice within ten consecutive days.

(c) If such violation is not corrected within a ten-day period, the code enforcement officer is hereby authorized and directed to cause a tree, plant, structure or obstruction constituting such violation to be trimmed, pruned or removed to eliminate such prohibited condition.

(d) The cost of such trimming, pruning or removal shall be assessed against the property owner or abutting property owner, as the case may be. The minimum fee for such service shall be \$10.00.

DIVISION 3. ARTERIAL STREETS*

Sec. 22-45.1. Reconstruction of arterial streets.

(a) "Arterial street," as used in any part of this division shall mean concrete streets with curbs, concrete or asphalt streets with curbs and gutters, and concrete or asphalt rural section (road-side ditches) roadways, in the absence of any further designation by the city council. However, the city council shall have the authority to deem that any street is or is not an "arterial street" within the meaning of this division.

(b) Sidewalks, curbs and gutters meeting the standards herein stated shall be required as part of the reconstruction of any arterial street in the city. The city council may decide that sidewalks, curbs and gutters are not necessary in some cases, considering the amount of pedestrian traffic and other safety factors.

(c) Sidewalks, curbs and gutters under this section shall be financed in the same manner as the reconstruction of the adjacent arterial street. (Ord. No. 2144, § 2, 4-19-88)

***Editor's note**—Sections 2—7 of Ord. No. 2144, adopted April 19, 1988, being not specifically amendatory of the Code, have been included herein as Div. 3, §§ 22-45.1—22-45.6, of Ch. 22, Art. II, at the discretion of the editor.

Sec. 22-45.2. Sidewalks without street reconstruction on arterial streets.

The city may choose to place on the capital projects list sidewalks, curbs and gutters adjacent to arterial streets that are not being reconstructed. In evaluating the need for such improvements on the capital projects list, the city shall consider, among other factors, safety, need (especially school-related pedestrian traffic), priorities, estimated costs and available means of financing. The city may also establish a liaison with the Angleton Independent School District to consider needs for school pedestrian traffic and sharing of costs.

(Ord. No. 2144, § 3, 4-19-88)

Sec. 22-45.3. Construction standards.

All sidewalks constructed or reconstructed within the city after the effective date of the ordinance from which this division is derived shall comply with the standards attached to this ordinance as Appendix A and incorporated herein in full, except as otherwise provided in section 23-70(b).

(b) *Individual tracts.* The city shall use the unit price contract for the construction, reconstruction, repair and realignment of sidewalks, curbs and gutters along any tract abutting a public street at the written request of the owner of the tract and at the owner's sole cost. The owner shall repay the city 100 percent of the cost of said improvements under the unit price contract, upon payment terms acceptable to the city. Construction shall not begin until the owner has agreed in writing to do so.

(c) *Block construction:*

- (1) Request: The city shall construct, reconstruct, repair and realign sidewalks, curbs

front, side and rear yard setback requirements of the zoning district in which it is located.

- e. *Modification of building size requirements.* The requirements of subsections (8)a. through (8)d. may be modified by the code enforcement officer in the case of administratively approved uses or by the city council after recommendation from the planning and zoning commission in the case of uses permitted by special use to encourage collocation.

- (9) *Removal of abandoned antennas and towers.* Any antenna or tower that is not operated for a continuous period of 12 months shall be considered abandoned, and the owner of such antenna or tower shall remove the same within 90 days of receipt of notice from the city notifying the owner of such abandonment. Failure to remove an abandoned antenna or tower within said 90 days shall be grounds to remove the tower or antenna at the owner's expense. If there are two or more users of a single tower, then this provision shall not become effective until all users cease using the tower.

(10) *Nonconforming uses.*

- a. *Not expansion of nonconforming use.* Towers that are constructed and antennas that are installed, in accordance with the provisions of this article shall not be deemed to constitute the expansion of a nonconforming use or structure.
- b. *Preexisting towers.* Preexisting towers shall be allowed to continue their usage as they presently exist subject to the requirements set out in subsection (3)c. Routine maintenance (including replacement with a new tower of like construction and height) shall be permitted on such preexisting towers. New construction other than routine maintenance on a preexisting tower shall comply with the requirements of this article.

- c. *Rebuilding damaged or destroyed nonconforming towers or antennas.* Notwithstanding subsection (9), bona fide nonconforming towers or antennas that are damaged or destroyed may be rebuilt without having to first obtain a special use permit but shall meet all current Building permits to rebuild the facility shall comply with the then applicable building codes and shall be obtained within 180 days from the date the facility is damaged or destroyed. If no permit is obtained or if said permit expires, the tower or antenna shall be deemed abandoned as specified in subsection (9).

(f) *Minimum dwelling unit area:* Minimum dwelling unit areas specified in this chapter shall be computed exclusive of breezeways, garages, open porches, carports and accessory buildings.

(g) *Open storage areas:* Open long-term storage of materials, commodities or equipment (where allowed in the specific zoning district) shall be located behind the front building line and observe all setback requirements for the main structure or building. This standard does not apply to short-term outside display (see definition of outside display in section 28-112; see screening requirements in section 28-104.

(h) *Sight visibility:*

- (1) Visual clearance shall be provided in all zoning districts so that no fence, wall, architectural screen, earth mounding, landscaping or other feature obstructs the vision of a motor vehicle driver approaching any street, alley, or driveway intersection. Whenever an intersection of a street(s), alley, and/or driveway occurs, a triangular visibility area shall be created. Landscaping, fences, walls, earthen berms and other features within the triangular visibility area shall be designed so as to provide unobstructed cross-visibility at a level between 30 inches and eight feet above the ground. The triangular areas are defined as follows:

- a. Alley intersects a public street right-of-way: The areas on both sides of

the intersection of an alley and a public street shall have a triangular visibility area with two sides of each triangle being a minimum of 20 feet in length from the point of intersection, and the third side being a line connecting the ends of the other two sides (see illustration 18).

- b. Street intersection or intersection of private driveway onto a public street: These areas shall have a triangular visibility area with two sides of each triangle being a minimum of 35 feet in length along the right-of-way lines (or along the driveway curb line and the street right-of-way line) from the point of the intersection, and the third side being a line connecting the ends of the other two sides (see illustration 18).
- (2) Shrubs and plant materials that are typically less than 30 inches in height at maturity may be located within sight visibility areas provided that they are kept maintained at a maximum height of 30 inches.
 - (3) A limited number of single-trunked trees having a clear trunk (i.e., branching) height of at least eight feet may be located within sight visibility areas provided that they are trimmed in such a manner that no limbs or foliage extend into the cross-visibility area defined above, and provided that they are spaced and positioned such that their trunks will not produce a visibility inhibiting, "picket-fence" effect when they attain mature size.

(i) *Nonresidential structures in residential districts:*

- (1) Nonresidential structures (e.g., churches, schools, day care centers, etc.) which are permitted in any residential zoning district (including AG) shall be designed and constructed such that they conform to the development standards set forth in the commercial-neighborhood (C-N) zoning district (i.e., with respect to maximum height, minimum lot size, minimum front/side/

rear setbacks, screening, exterior building construction, etc.) unless otherwise stated in this chapter or in an ordinance establishing a PD.

(j) *Access standards for nonresidential and multi-family lots:*

- (1) All nonresidential lots (including pad sites) shall share driveway curb openings via mutual access easements from one lot to adjacent lots (for fire and emergency access, as well as for public convenience).
- (2) All nonresidential and multi-family lots (including pad sites) shall have either direct or indirect (via mutual access/fire lane easements on adjacent property) access to a median opening if located on a median-divided roadway (existing or planned in the future). Driveways for all nonresidential and multi-family lots (including pad sites) shall align, to the greatest extent possible, with any existing or proposed driveways on the other side of any type of roadway.

(Ord. No. 2009-O-4A, §§ (V)(43)(43.1—43.10), 4-14-09)

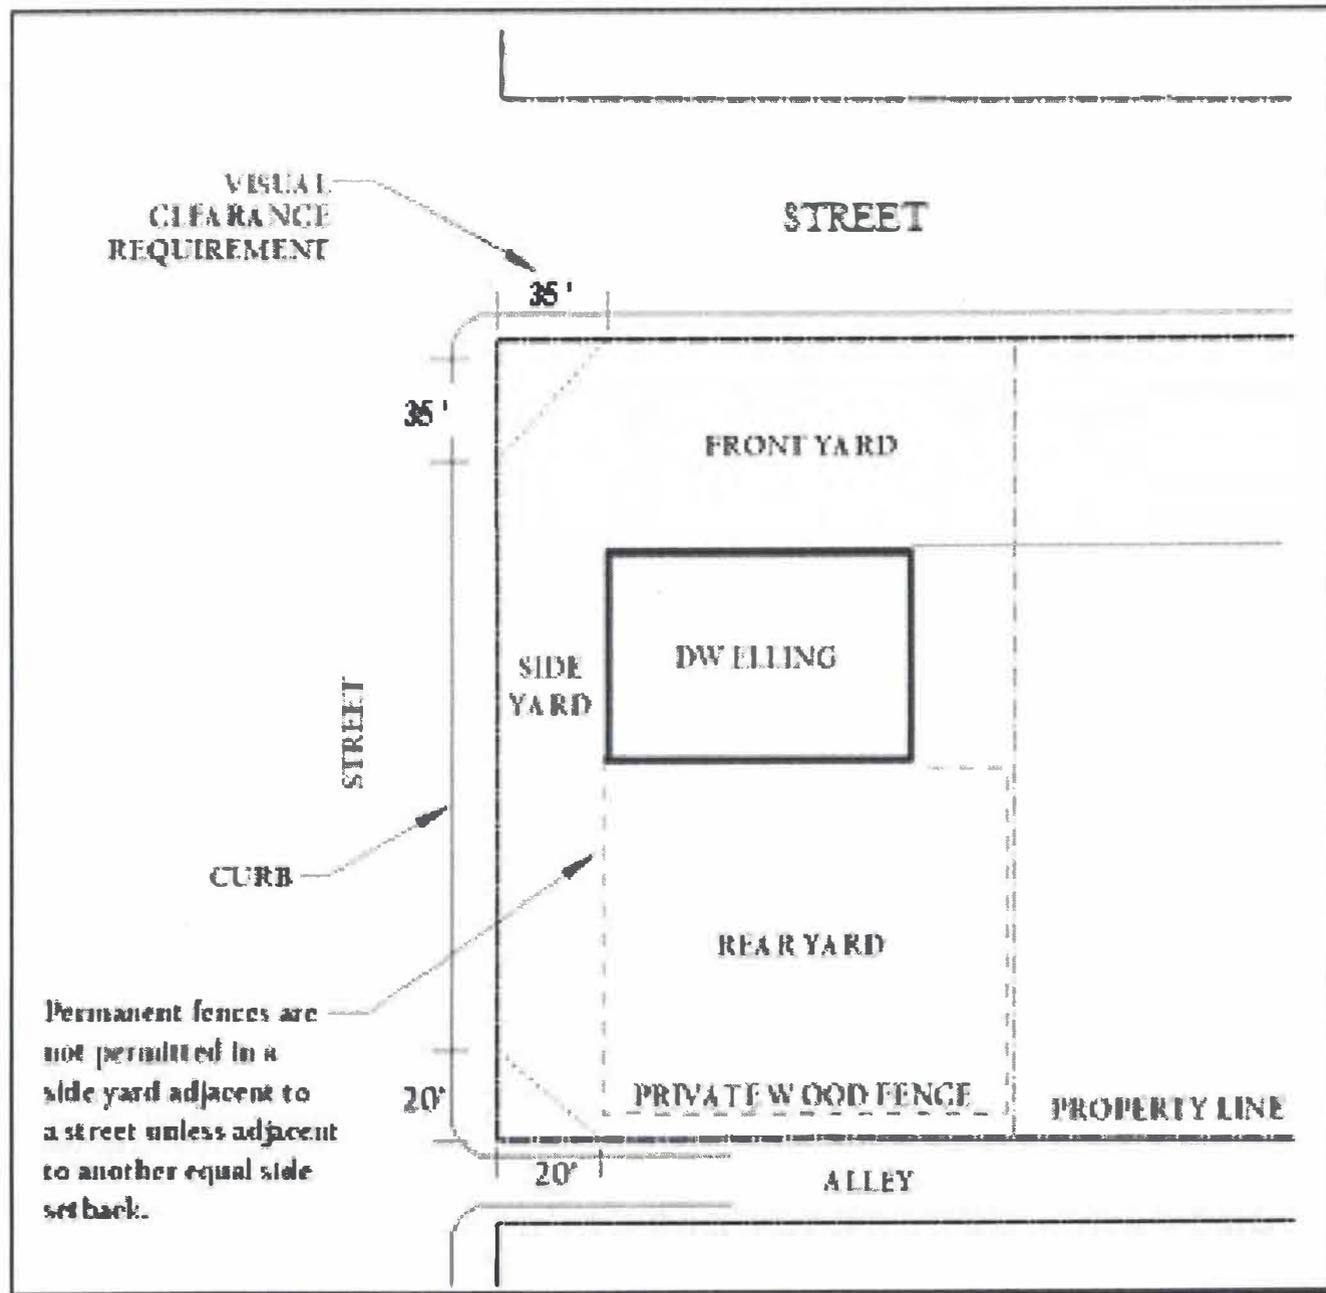

Sec. 28-107. Performance standards.

(a) *Performance standards—general:*

- (1) *Compliance required:* No land or building in any district shall be used or occupied in any manner so as to create any dangerous, injurious, noxious, or otherwise objectionable fire, explosive, or other hazards; noise or vibration; smoke, dust, odor, or other form of air pollution; heat, cold, dampness, electrical, or other substance, condition, or element in such a manner or in such an amount as to adversely affect the surrounding area or adjoining the premise. Any use permitted or not expressly prohibited by this chapter may be undertaken and maintained if it conforms to the regulations of this section limiting dangerous and objectionable elements at the point of determination of their existence.

Angleton, Texas

Mr. Tropoli:

As presented, this development will consist of sixteen (16) townhomes. There will be on-site detention adequate for this development. The detention will have a berm on its south side between the pond and 13 Ditch. There will be a 15-inch outlet pipe from the pond into 13 Ditch. Where the outlet pipe enters 13 Ditch, slope paving will be constructed.
